Summit Medical Group is pleased to serve patients at many convenient locations in northern and central New Jersey.
Physician Assistants (PAs)

PAs are certified medical professionals licensed to practice medical services delegated by physicians. Like APNs, PAs also provide a wide range of health care services in emergency medicine, family medicine, internal medicine, pediatrics, surgery and other medical specialties and services.

APNs and PAs are trained to:

- Take patient histories and perform physicals
- Diagnose and treat a variety of acute and chronic conditions
- Order tests and interpret results
- Discuss and develop treatment plans
- Prescribe medications
- Perform minor surgical procedures and assist with major surgeries
- Expand access to care
- Coordinate care with other team members
- Serve as Primary Care providers

APNs and PAs are highly qualified, well prepared members of your health care team. Together, they will partner with you to increase your access to streamlined care, helping you to live well and stay well!

Advanced Practice Nurses (APNs)

APNs are registered nurses who receive advanced education and clinical training. This advanced training prepares them to provide a wide range of health care services and enables them to practice in various fields of medicine in collaboration with physicians. APNs deliver health care services in emergency medicine, family medicine, internal medicine, pediatrics, surgery, and other medical specialties and services.
